PORTABLE, ECONOMICAL, VERSATILE LIFTING SOLUTIONS

Moving and lifting heavy materials doesn't have to involve installing expensive equipment or permanently changing your facility. SPANCO Gantry Cranes do the job efficiently and economically.

- No permanent installation required, making gantry cranes ideal if you rent or lease your facility.
- Quick and easy assembly.
- Portable design allows for relocation for use in more than one facility or work area.
- Gantry construction incorporates standard American I-beams. All nuts, bolts, and pins are plated for corrosion resistance.
- All gantries are painted SPANCO yellow.

SPANCO Gantry Cranes provide a wide range of lifting solutions for many types of applications.

Portable Gantries

Plant maintenance applications requiring replacement and relocation of equipment and machinery. Service truck applications requiring quick knockdown for fast and easy movement to and from a work site.

Adjustable Gantries

Warehousing applications requiring the movement of loads through aisles, doorways, around obstacles, and over or under obstructions. Welding and fabrication shop applications using fixed or adjustable gantries for lifting parts and equipment into position.

Track Mounted Gantries

Applications requiring lifting and moving of heavy loads over a fixed route, either manual or motorized.

Standard for Design

SPANCO Gantry Cranes are designed to provide dependable, durable lifting solutions. Each gantry is manufactured in accordance with our interpretation of the following standards:

- Crane Manufacturers Association of America (CMAA)
- American Welding Society
- Occupational Safety and Health Administration (OSHA)

Users should check each installation for compliance with the applicable operating and maintenance requirements of these standards.

Our equipment is intended for industrial use only and is not designed for transport of human cargo.

GANTRY CRANES

V-GROOVE CASTERS

Optional Track-Mounting

- Use with SPANCO V-groove track.
- Fixed length angle track is available in 5, 15, and 20 ft. stock lengths.
 - five foot removable lengths allow clear passage of track by lift truck
 - six inch removable track is available for use under overhead doors
- Track is constructed of inverted steel angle welded to a flat strip for use with 3/8 inch lag bolts (not supplied), with male/female ends for true alignment.
- For applications requiring the movement of a load along a fixed route.
- Cost effective alternative to expensive overhead monorails and bridge cranes.
- Simple installation and removal.
- No permanent ironwork required.
- Ideal if you rent or lease your facility.
- V-groove power drive kits available for use with PF or T Series.

| ANGLE TRACK FOR USE WITH V-GROOVE CASTERS | | | | | | | | |
|---|--------|---|------------|-------------|--|--|--|--|

SELECTING YOUR SPANCO GANTRY CRANE

T SERIES 3-Way Adjustable (Motorized option available.)

These gantries are fabricated from heavy gauge square mechanical tubing, offer the greatest under I-beam height and range of adjustability. Maximum flexibility of span, height, and tread adjustment allows use on uneven flooring. Adjustability allows travel throughdoorways and aisles, under mezzanines, or other overhead obstructions.

- All steel construction capacities to 10 Ton.
 - maximum overall heights to 24'-3.....standard spans to 40 ft.
- Steel construction with aluminum I-beam capacities to 3 Ton.
 - maximum overall heights to 22'-6".....standard spans to 15 ft.

A SERIES (Motorized option not available.)

These gantries are fabricated from heavy gauge rectangular mechanical tubing, provide a lower cost and lighter weight lifting alternative to the T Series for applications requiring movement through doorways and under obstructions. Design does not require brace legs, allowing greater clear span. Adjustable span optional.

- All steel construction, adjustable and fixed height capacities to 10 ton.
 - maximum under beam heights to 16 ft..... standard spans to 40 ft.
- All aluminum construction, adjustable height/span capacities to 3 ton.
 - maximum under beam heights to 12'-2".....standard spans to 15 ft.

E SERIES ECONOMY (Motorized option not available.)

These gantries are fabricated from heavy gauge square mechanical tubing, offer a no-frills lifting alternative to A Series in fixed and adjustable heights and spans.

- Steel construction, fixed height capacities to 5 Ton.
 - standard under beam height 10 ft..... standard span 12 ft.
- Steel construction, adjustable height/span standard capacities to 3 Ton
 - maximum under beam heights to 14 ft..... standard span 11'-6"

PF SERIES (Motorized option available.)

These gantries are fabricated and welded from heavy gauge steel mechanical tubing, provide solid lifting for applications requiring movement of large heavy loads. Ample bracing ensures high rigidity for trackless or track-mounted motor-driven applications. Offers greatest fixed height. Ideal for motorized applications and single leg (semi-gantry) configurations.

- All steel construction capacities to 15 Ton.
 - maximum under beam heights to 35 ft..... standard spans to 40 ft.

Floor Protecting Casters

- Standard on all gantries through 15 Ton.
- Wheels feature moldon polyurethane tread that provides maximum floor protection, resisting chipping and outwearing ordinary plastic wheels.
- Equipped with four-position swivel locks (except E series).
 Casters lock at 90° intervals to allow travel in a straight line and to help prevent movement under load when locked in opposable directions.
- Wheel brakes and other optional accessories can be supplied on all gantries. SPANCO can supply any style of caster to meet customer specifications.

T SERIES

- All steel construction capacities to 10 Ton.
 - maximum overall heights to 24'-3"....standard spans to 40 ft.
- Steel construction with aluminum I-beam capacities to 3 Ton.
 - maximum overall heights to 22'-6".....standard spans to 15 ft.

"True A-frame" Design

Virtually eliminates the swaying motion common to other three-way adjustable gantry designs and gives greater stability while allowing the I-beam to pivot independently of the legs and to self-center over the load.

Construction

The main legs, brace legs, and caster frames are constructed of heavy gauge square tubing. Zinc plated hardware ensures longevity.

Adjustable Span

Spanloc[™] ensures secure positioning of I-beam while allowing span adjustment for inboard/outboard bracing or cantilever configuration. Cantilever capacity is 25% of regular capacity (maximum cantilever is 4'). Counterweight is required for cantilever.

Adjustable Height

The main legs adjust at six-inch intervals to accommodate uneven floor levels. The height of the main legs is adjusted by inserting or removing a pair of push/pull pins.

Adjustable Tread

The caster frame tread easily adjusts to allow movement through narrow passageways. A cable assembly, bolted inside the caster frame tubes, prevents overspreading when tread width is adjusted. Tread should increase as height increases.

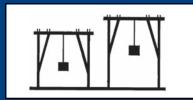

Casters

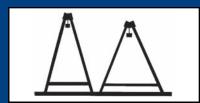

Adjustable Span

^{*}capped I-beam

Detachable Height Adjustment Kits

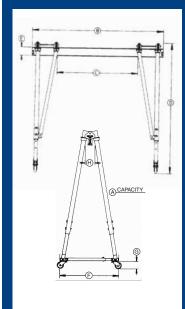

Convenient for frequent height adjustments. Eliminates the need for an overhead hoist or fork-lift truck. Kits consist of two units and include models to handle gantry capacities to 10 tons. Since only one end of the gantry can be adjusted at a time, order two kits to eliminate transfer of kits from end to end. (To be used under no load conditions only.)

| KIT NO. | DESCRIPTION | NET WT. |
|----------|--------------------------|---------|
| THA 1-5 | For Gantry Cap. 1-5 Ton | 94 |
| THA 8-10 | For Gantry Cap. 8-10 Ton | 97 |

Motorized gantries available, see Page 19 for details.

T SERIES GANTRY CRANES

| FLANGE WIDTH |
|--------------|
| 3 3/8" |
| 4" |
| 4 5/8" |
| 5" |
| |

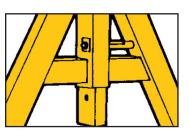

A SERIES CANTRY CRANES

A SERIES

- All steel construction, adjustable and fixed height capacities to 10 Ton.
 - maximum under beam heights to 16 ft..... standard spans to 40 ft.
- All aluminum construction, adjustable height/span capacities to 3 Ton.
 - maximum under beam heights to 12'-2".....standard spans to 15 ft.

Motorized option not available.

Not recommended for use with motor driven hoist trolley.

Spring-Loaded Height Adjustment

Six inch incremental height adjustment secures with springloaded steel locking pins, which automatically engage when height positioning holes are reached.

Adjustable Span

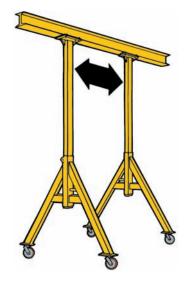

Allows for easy width adjustment without drilling the I-beam. The kit is standard on all aluminum models and is optional on steel models. Does not require factory installation.

Casters

Four-position, swivel lock casters with moldon polyurethane wheels protect floors from damage.

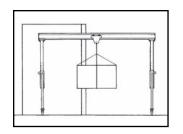

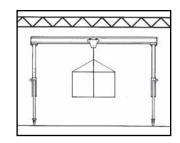

Optional Adjustable Span Kit

A SERIES
GANTRY
CRANES

Moves through doorways, under obstructions, lifts on uneven surfaces

Option

LUG-ALL Winch-Hoist Kit - Adjusts the gantry height according to job specific lifting requirements and/or movement through doorways. The kit includes two LUG-ALL cable winch-hoists. For use with A Series gantries only.

(To be used under no load condition only).

Not for use with E Series Adjustable Height Gantries. Not recommended for use with motor driven hoist trolley.

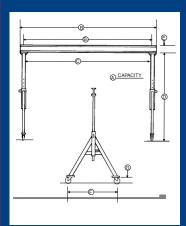

| WEIGHT | PART NO. |
|-----------|-------------|
| 16 pounds | 03015 |
| 20 pounds | 03090* |

For use with gantries

^{*}For use with gantries weighing over 3,000 lb., including weight of hoist and trolleys

Aluminum Gantries

- Ideal for constant assembly and disassembly, such as use on service trucks.
- Weights start at 116 lb. for easy maneuvering and portability.
- Lightweight construction for easy portability.
- Standard span adjustments.
- Corrosion resistant and suitable for use in refrigeration areas, clean rooms, and other controlled environments.

Shown with optional pneumatic tires.

| I-BEAM | FLANG | E WIDTH |
|-----------------|-------|---------|
| ΔΙΙΙ5" - 3 //3# | | 3" |

Capped I-Beam

ALU6" - 4.3#

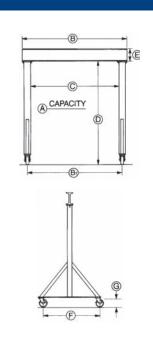

2' extension to top of gantry is removable and can be ordered separately to increase height of 9 foot models.

gantry is removeable and can be ordered separately to increase models. For 1 Ton, 2 Ton, or 3 Ton models only.

Motorized option not available.

Not recommended for use with motor driven hoist trolley.

E SERIES

Steel construction, fixed height capacities to 5 Ton. **Steel construction, adjustable height/span** capacities to 3 Ton.

- Constructed with high-strength square mechanical tubing.
- Rolls easily on durable moldon polyurethane wheels.
- Wheel brakes, swivel locks, and other wheel and caster styles available.
- E series adjustable gantries provide a no-frills alternative to A series for moving loads up to three tons.
- Height adjustment at six inch increments.

Motorized option not available.

Not recommended for use with motor driven hoist trolley.

PF SERIES GANTRY CRANES

PF SERIES

All steel construction capacities to

- Maximum under beam heights to 35 ft.
- Standard spans to 40 ft.
- Custom design spans to 60 ft.

Ideal for applications with the following conditions:

- An ecomonical, versatile lifting system is needed to supplement an existing overhead lifting system.
- Your facility construction will not support jib or overhead cranes. Gantry cranes are selfsupporting and travel directly on the floor.
 - Your lifting volume is moderate and does not justify the cost of more expensive, permanentlyinstalled equipment. Standard models are designed for CMAA Class C rating. (moderate service).
 - If you rent your facility, gantries can be moved from one location to another.
 - Ideal for motorized track. See Page 19 for details.

Ton

PF SERIES - 7 1/2 - 15

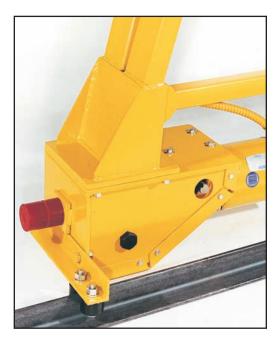

POWER DRIVES (Available on T and PF Series only)

Power drive kit includes two-drive assemblies with either polyurethane (trackless) or V-groove wheels, sprockets, chains, two-gear reducers, two single-speed, 230/460V-three phase TEFC motors, solid state adjustable "soft start," and two-idler assemblies. Standard travel speed is 50 FPM. Other speeds and voltages available on request.

Trackless Kit- also includes guide rollers on one drive and one idler assembly. Idler and drive assemblies are supplied with polyurethane bumpers.

Custom Power Installation Options

- Crane controls.
- Control enclosures suitable for severe environments or hazardous areas.
- Multi-speed AC inverter drives.
- Motor brakes.
- Air-driven power drive kits.
- Crane wiring with rubber covered S.O. type cable.
- Crane wiring in metal conduit.
- Cable reels and electrification systems.
- Push-button stations.
- Tag line festooning systems.
- Flat wire and box track festooning systems.
- Warning lights, audible alarms, or travel limit switches.
- Top running and under running end trucks for single leg (semi-gantry) applications.

| DRIVE ASSEMBLY DESCRIPTION | MAX LOAD PER END OF GANTRY (MLG) | HP | WT | PART NO. |
|-------------------------------|----------------------------------|-------|------|----------|
| | 6,000 | 1/3 | 320 | 07301 |
| V-Groove | 16,700 | 1/2 | 350 | 07101 |
| Track Mounted | 30,000 | 1 | 900 | 07201 |
| | 40,000 | 1 1/2 | 1100 | 07401 |
| | 7,000 | 1/2 | 360 | 07102 |
| Trackless | 12000 | 3/4 | 770 | 07202 |
| Hackiess | 18000 | 1 | 1300 | 07402 |
| | 36000 | 2 | 1650 | 07302 |

NOTE: The addition of a drive assembly will slightly change the height under beam

Trackless drive kit shown with guide rollers

POWER DRIVES FOR GANTRY CRANES

Selecting Your Power Drive

Calculate the Maximum Load per End of Gantry (MLG) by using the formula:

$$MLG = P + H + \frac{G}{2}$$

P = Rated load capacity(1 ton = 2000 lb.)

 \mathbf{H} = Weight of hoist and trolley

G = Weight of gantry (All measures in pounds)

Compare the calculated MLG number with the MLG numbers on the chart. If your MLG number falls between two MLG chart numbers, choose the next higher chart number.

Example: 3-ton capacity PF Series gantry, model 3PF1520B

P = 6,000 lb.

H = 900 lb. (use 15% of rated load if hoist weight is not available)

G = 1378 lb.

MLG =
$$6,000 + 900 + \frac{1378}{2} = 7,589 \text{ lb.}$$

In the example, you would select power drive part number 07101 for a V-groove track mounted assembly or part number 07202 for a trackless assembly.

Optional Control Panel - Includes mainline magnetic power disconnect, reversing magnetic contactor, thermal overload, 115V fused control transformer, branch circuit fusing to crane motors, and solid state adjustable "soft start" control adjustable for time and torque in a NEMA 3R enclosure.

(When control panel is ordered with power drive kit, a "soft start" will be wired in panel. If control

panel is not ordered, "soft start" is supplied for wiring in customer's panel.)

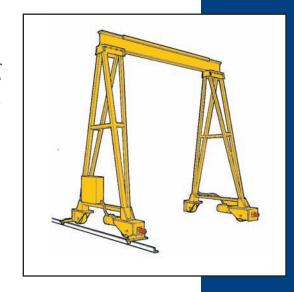

Turn Key Systems - complete with controls and wiring are available.

Power Driven Double Leg Trackless Gantry with Floor Guide

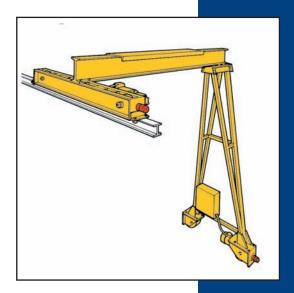

Ideal for applications requiring a gantry to run against a wall. A guide angle (supplied by others) lags to the floor along the wall guiding the gantry which travels directly on the floor on polyurethane wheels.

For trackless use in an open, clear area where a guide angle on the floor is not practical. A selector switch can be incorporated in the control pendant to selectively turn each motor on and off to compensate for skewing.

Single Leg, Top Running End Truck

The single leg design maximizes space utility in confined, narrow areas by traveling down an aisle on polyurethane wheels while the other end of the I-beam mounts on an end truck traveling on an overhead runway.

Single Leg, Under Running End Truck

A single leg gantry can also be used with an under running end truck on one end which travels on the bottom flange of an overhead runway beam. Max span to 20 feet.

CUSTOM DESIGNED SINGLE OR DOUBLE LEG, WIDE FLANGE BEAM CONSTRUCTION GANTRY CRANES

Built with double flanged wheels for travel on ASCE rail or polyurethane wheels for direct floor travel.

Consider if your lifting application requires

- Supplemental coverage for an overhead crane.
- The facility floor remaining unaltered.
- Wide clear passage for vehicles and/or personnel.

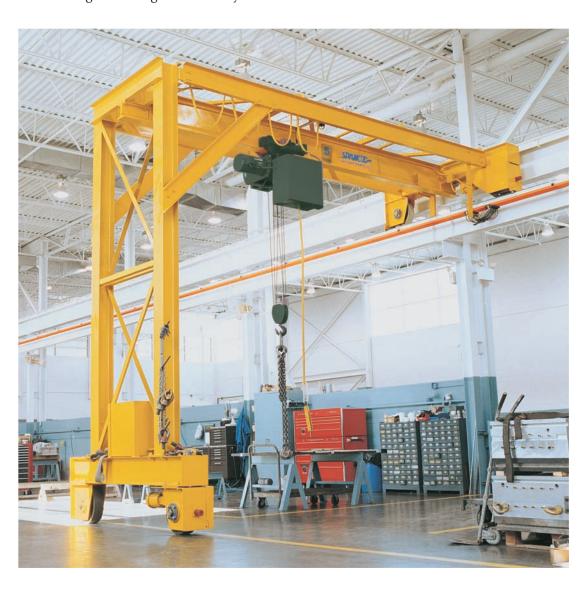

Custom Designed Solution

The general design of wide flange beam construction equips the end trucks with identical wheels and power drives ensuring

- Smooth start-up.
- Precise alignment for even wear on wheels.
- Stable movement.

End Truck Design

- Customize power and speed to meet your application.
- Rotating axle design allows easy service of drive units.

Lower end truck uses large diameter tread wheels. Rotating axle design facilitates easy servicing of wheels, axles, and bearings.

Guide rollers and anti-kickup rollers securely align upper end truck against both sides of track flange.

Double Flanged Wheels

- Meets higher duty service classifications to CMAA Class E, mill service.
- Higher travel speed available for rail mounted cranes up to maximum 150 FPM.

Polyurethane Wheels

- Moderate duty service, CMAA Class C.
- Maximum 80 FPM travel speed.
- Maximum traction. Quiet, direct floor operation.
- Facility floor remains unaltered.

Options

- Multi-speed AC inverter drives.
- Motor brakes.
- Air drives.
- Push-button station.
- Warning lights, audible alarms, flood lights, or travel limit switches.
- Top running or under running end trucks for single leg (semi-gantry) applications.
- Designed for severe environments or hazardous areas.
- Special paint finishes.

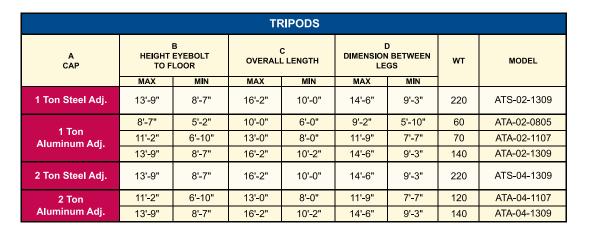

TRIPODS

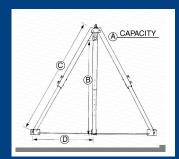

TRIPODS

Quick, easy setup for heavy lifting in outdoor areas with no overhead support.

Steel and aluminum construction capacities to two tons.

- Independently, adjustable legs permit use on uneven ground and adjust on six inch centers.
- Standard lashing kit, included with every tripod, prevents legs from spreading on hard or soft surfaces.

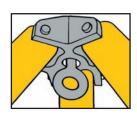

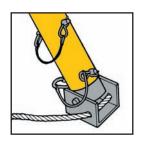

Free swiveling eyebolt hangs plumb to protect tripod head from twist and strain.

Aluminum feet are used on all hard surfaces. Standard on all models unless otherwise specified.

Mud feet are used on soft ground. Integral spikes firmly entrench legs to prevent slipping or sinking into ground. Complete interchangeability with aluminum feet. Mud feet are available for an additional charge.
